Montway Automation Portal (M.A.P.)

The digitalization of the automotive transportation industry is here

Unlock new levels of efficiency and visibility of your vehicle movements

The Montway Automation Portal, called M.A.P., was created to address the lack of visibility in the automotive supply chain. Most auto dealerships, auctions and businesses that rely on auto logistics do not know the exact location of their inbound and outbound units. Plus, the majority of vehicle movements still rely on phone calls, emails, manual tasks and a variety of platforms to get the job done—an approach that is time consuming, expensive and outdated.

M.A.P. offers a smarter way to book orders and manage inventory. The M.A.P. platform is built on industry-leading technology and a transportation management system to optimize the entire vehicle movement process.

Automated booking with the capability to add unlimited VINs and efficiently create orders in a single click.

Visibility of all units with statuses and ETAs to better manage inventory and mitigate potential disruptions.

On-demand pricing based on fair market value to save time negotiating with vendors and improve budgeting.

Real-time tracking to see units in transit, plus public tracking links for end customers to improve satisfaction.

Central location for digital records, including bill of ladings, gate passes and photos, improving efficiency.

M.A.P. is a more efficient, reliable and cost-effective solution for moving units and managing vehicle inventory. Request a demo to learn more.

ABOUT MONTWAY

Montway Auto Transport is one of the nation's leading auto logistics companies, arranging shipments for over one million vehicles since 2007. With a focus on innovation, technology and customer service, we set the standard in the industry. Montway is A+ accredited by the BBB and has a 4.7-star customer rating across all top review sites.
